

# Nano Science and Technology Consortium

## Do Business in India with NSTC

India is a huge market and a fast growing economy. This makes India a very lucrative market for the nano tech driven products.

With our strong understanding of the Indian Nanotechnology market, we can help you connect with Indian Industry so that you can expand your markets, extend your resources by outsourcing some of your research and collaborating with research focused companies in India and attract viable commercial partners for your venture.

It gets confusing for small to mid-size companies to navigate India's markets or select a quality vendor that can meet their offshoring needs. And making a wrong choice can cost you money and time. Let us partner with you to make this process easy for you so that you can focus on developing your products and markets.

- Professional Experience
- Strong Nanotechnology Business and Market insight
- Performance driven cost and success based fees
- Express project implementation
- Extensive industrial and academic network
- Specialized and dedicated Market Research Team

### Why NSTC?

A Nanotechnology platform

Put our services to the test, please contact us by email or phone.

Accelerate your business potential with NSTC

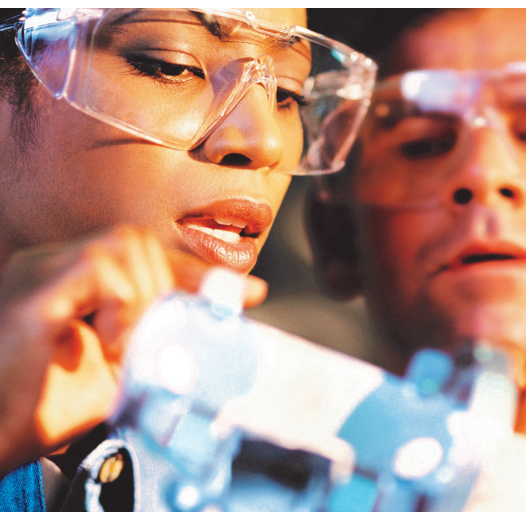

# Effective Solutions For Your Business Success

NSTC is a nano technology organization dedicated to promote the potential of nanotechnology and commercializing its applications. Since 2005, NSTC has been mapping and analyzing technology and market trends, identifying and engaging with major players, participating in evolving government policy, and monitoring changes in regulation and legislation.

This knowledge and experience is available to clients through our consultancy services.

## Focus Industries

- Textiles
- Pharmaceuticals
- Electronics
- Defence
- Aerospace
- Automotive
- Oil & gas
- Energy
- Rubber and Tyre
- Food and food packaging
- Paints & Coatings
- Adhesives & Sealants
- Cosmetics & Healthcare
- Plastic
- Water and Waste Water Management
- Paper
- Construction
- Laboratory Research

## Our Vision

*To be the foremost global nanotechnology information provider and membership organization.*

## Our Mission

*To foster, develop and promote all aspects of Nanotechnology that have the potential to benefit society and the environment at large.*

## Big Solutions in Small Technologies

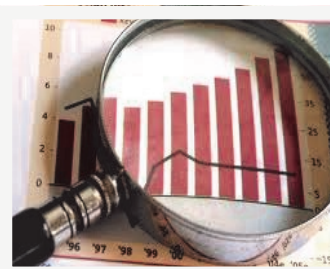

NSTC recommends specific actions to align your goals to immediately improve your venture. Your objectives may include commercializing and/or licensing nanotechnologies, new market entry activities, producing nano-materials in high volume, or developing next-generation manufactured products built from nano-products that leapfrog existing products and bulk technologies. NSTC delivers customized strategies serving your needs including business plans for raising capital or attracting commercial partners.

NSTC's clients range from new start-ups to multinational corporations, and include R&D specialists, manufacturers, investors, industry groups and companies concerned with intellectual property strategy and evaluation.

### Market Intelligence

Starting with a client's product or manufacturing process, we provide tailored market intelligence comprising current and future unit and market valuations, opportunities in different markets and global regions, and assessment of the competitive environment; allowing our clients to make informed decisions on future business strategy.

### Technology Assessment

We review current products and manufacturing processes employed by our clients, and advise how nano and other advanced technologies will impact their business and can be harnessed to enhance product value and manufacturing efficiency.

### Technology Transfer

We are a specialist in the transfer of technology and has the know-how and organization required in the process of moving results of scientific research from the laboratory to the marketplace and society. Our strong understanding of Indian Market will help you to expand your markets, extend your resources by outsourcing some of your research and collaborating with research focused companies in India.

### Technology Marketing

Due to increasing competition and a rapidly evolving technology landscape, reaching the right buyer at the right time with your message has never been more important. NSTC can help you take your targeting to the next level by identifying those businesses with the highest likelihood of purchasing your product or a promising technology.

### Joint Development

Helping the companies with complimentary skills to tie up together towards a new technology development

## Our Approach
